

INSTITUTE OF ECOLOGY

RECEIVED NOV 22 1973

November 14, 1973

Ms. Elizabeth Block
Environmental Impact Assessment Group
Canadian Environmental Law Association
one Spadian Crescent Toronto Ontario M5S 2J5

Dear Ms. Block:

Enclosed please find the following complimentary publication which you requested from the Institute of Ecology.

Optimum Pathway Matrix Approach to the Environmental Decision Making Process / Testcase: Relative Impact of Proposed Highway Alternatives.

The report is based on a study that the Institute made at the request of the State of Georgia in an effort to resolve an impasse that had developed over the location of an interstate highway. The Institute believes the method used in the study has wide application for impact studies leading to choices of sites for airports, atomic power plants, large industrial plants, etc., as well as for highways. The publication includes the tables, the charts, and the manuscript of the report plus the computer program.

If the Institute can be of further service to you, please let us know.

Thanking you for your interest in the University of Georgia's Institute of Ecology, I am

Yours truly,

Lorraine Edwards
Communications Editor
