Gentlemen,

On behalf of the Northern Quebec Inuit Association and the four thousand Inuit of Quebec whom it represents, I wish to congratulate your Association for its receipt of the 1974 White Owl Conservation Award.

For thousand of years the Inuit have lived in harmony with a land which has provided them with both physical and spiritual sustenance. Now we are forced to defend that land from ill conceived, destructive development. In the long run, we know that fight can only be won with the sympathy and support of southern Canadians. Your efforts to educate the Canadian public to the inadequacy of legal safeguards for the environment, and to institute change and improvements to the legal system are vitally important.

We hope that our two associations can work together in the future. Again congratulations.
