INFORMATION : EDITORS/OTHERS

"The Land and the People North of 50" and "The North - Its Industry and Commerce", the first two chapters of a projected volume of information based on the issues of northern Ontario as they were raised at the 1977-78 preliminary meetings of the Royal Commission on the Northern Environment, are enclosed for your interest, together with an introductory letter by Mr. Justice E. P. Hartt.

Distribution of these chapters will be to interested groups and citizens in line with the Commission's policy of making information available in an orderly manner at the earliest opportunity.

The contents of the complete Issues volume will, in the main, be based on the words of the people of the north. The views of groups and individuals concerned with the future of the north will be identified in much the same manner in which they were presented to the Commission.
