Mr. Michael H. Boggs
Chief Administrative Officer
City of Burlington
P.O. Box 5013
Burlington, Ontario
L7R 3Z6

Dear Mr. Boggs:

Re: Bayview Park former Landfill Site
City of Burlington
Our File No. WM 11-02

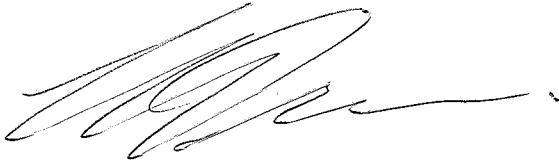

This will acknowledge your letter of October 4, 1982, with regard to the City's request for lab analysis in support of a proposed research study at the above site.

We are advised that proposals of this nature are usually given consideration by the Ministry's Research Advisory Committee (RAC) for support from the Provincial Lottery Fund. It is also understood that the program of landfill research that is being conducted by the Waterloo Hydrogeology Group is being currently funded by a grant from the Ontario Lottery Fund. If the current research proposal is in addition to the original contract, a new proposal should be submitted for consideration of the Committee. Since grants by the RAC are based on having the cost of any analyses required covered as part of the grant funds, our laboratory is not usually requested to perform the analyses. As such Ministry participation in various research studies is not limited or constrained by commitments to meet the analyses requirements of such studies at the expense of our routine programs and special projects.

Further to our letter of September 20, 1982, we have been asked to consider reducing current commitments to our laboratory by 10 to 15% in order for the Ministry to reduce present laboratory sample backlog and to carry out new initiatives. However, should the City decide to implement a long-term monitoring program at the site, we are prepared to review the requirements for long-term sample analyses with your hydrogeologist.

If you have any comments or questions concerning the establishment of a suitable program at the site, please contact our Mr. G.L. McCarty at this office.

Yours very truly,

G.R. Trewin, P.Eng.
Manager
Municipal and Private Abatement Section
