Dear Sir/Madam,

Re: Environmental Assessment of Landfill Component of
Halton's Solid Waste Management System
File: 3708.432

On March 7, 1984 the Council of the Regional Municipality of Halton authorized the circulation of the Draft Stage 2B Report, February 1984 which identified six candidate sites for landfill in Halton Region. This report was circulated to you for your comments by March 30, 1984. The comments which were received have now been reviewed and analyzed by the consultants and incorporated into the report entitled Analysis of Submissions Phase 2, Stage 2B Selection of Candidate Sites, April 1984, a copy of which is enclosed.

A number of revisions to the Draft Stage 2B Report were made as a result of the comments which were received however, many of these concerns are more appropriately dealt with in Stage 2C, the next, more detailed level of analysis.

Also enclosed is a report entitled Comparison of Phase 2 Stage 2B Draft and Consolidation Reports, April 1984. This report outlines the changes which were made to the Draft Stage 2B Report as a result of many of the comments received. These revisions have been included in the Consolidation Report, Phase 2 Stage 2B, Selection of Candidate Sites, a copy of which has also been enclosed. Finally, a page entitled Errata Appendices Phase 2 Stage 2B has been prepared to indicate the changes made to the Stage 2B Appendices Report, February 1984, which was circulated previously.

On Wednesday, May 9, 1984, Regional Council ratified the six candidate sites identified in the Stage 2B Site Selection Stage for further consideration for future landfill. Regional Council also confirmed that the consultants be directed to seek a single site for landfill as opposed to a multi-site approach.
