Dear Toby:

Re: CBA - Sustainable Development Action Plan

It was good talking to you last week, and I can appreciate how busy you must be at this time. As you know, the workplan for the project requires the submission of the issue papers prior to the preparation of the overview report. This last task is looming ahead of me for the month of May making it critical that we receive at least a rough draft of the recommendations put forward by each of the authors. You indicated when we spoke that you could put together the paper in the first part of May. If at all possible, could I see at least a rough draft of your recommendations by May 4. This would assist me in factoring them into the overall report. We can always fine tune the recommendations once you have finalized your paper.

I look forward to hearing from you.

Yours truly,

SWINTON & COMPANY
