

GREAT LAKES UNITED

March 21, 1991

Dear Members and Friends of Great Lakes United:

On behalf of the **Board of the Directors of Great Lakes United**, it is my pleasure to invite you to attend our **Ninth Annual Meeting** to be held **May 3-5, 1991** at **PALAIS des CONGRES**, in **Ottawa-Hull, Quebec**.

This year's meeting will be an excellent opportunity for Great Lakes United to raise the profile of Great Lakes issues in Canada's national capital. We have a number of exciting presentations that will provide new information and ideas on Great Lakes problems including evaluating progress on achieving Zero Discharge in Lake Superior and on exploration of the toxic tragedy of the Beluga whales who live along the St. Lawrence River outflow of the Great Lakes.

Great Lakes United has launched a number of exciting new initiatives in 1991 including a major campaign targeted at expanding the implementation of pollution prevention programs throughout the basin. In both Canada and the U.S. there are significant opportunities to take major steps towards achieving the goals of the Great Lakes Water Quality Agreement. We look forward to receiving your ideas and input to help achieve this and other goals.

I extend a personal invitation to you to attend the meeting. We want to bring you up to date on our past year's activities and work with you to launch new programs and actions for the coming year. I also urge you to take advantage of this opportunity to visit Canada's capital and to raise the awareness of Great Lakes concerns. We look forward to seeing you in Hull-Ottawa.

Sincerely,

John Jackson,
President

An international organization dedicated to conserving and protecting the Great Lakes and St. Lawrence River"
