Preface

According to the United Nation's Intergovernmental Panel on Climate Change (IPCC), human activities are substantially increasing the atmospheric concentrations of greenhouse gases: carbon dioxide, methane, chlorofluorocarbons (CFCs) and nitrous oxides.

If few steps are taken to reduce emissions, a doubling of carbon equivalent concentrations from the pre-industrial level is anticipated by 2025. The IPCC anticipates that a doubling of carbon equivalent concentrations could cause temperature change in the range of 1.9 to 5.2 degrees Celsius, with 2.5 degrees Celsius as the best estimate.

Even small changes in global mean temperature can have enormous consequences for the planet and its ecosystems. Global warming could cause sea-levels to rise; change the distribution and seasonal availability of fresh water resources; jeopardize global food security; increase political instability and the potential for international conflict; jeopardize prospects for sustainable development and the reduction of poverty; accelerate the extinction of animal and plant species; and alter the yield, productivity and biological diversity of natural and managed ecosystems, particularly forests.

In 1992, Canada became a signatory to the Rio Treaty on Climate Change. This treaty stipulates that Canada should adopt policies and programmes to stabilize its greenhouse gas emissions at the 1990 level by the year 2000.

In 1993, The Ontario Global Warming Coalition conducted a survey of political and corporate leaders to assess the level of support for policies and programmes aimed at stabilizing and eventually reducing greenhouse gas emissions. The results of that survey are contained within this report.

**1993 Climate Change Survey Report**

Introduction

In the summer of 1993 the Ontario Global Warming Coalition conducted a Climate Change Survey to determine the level of commitment of key decision-makers for action plans to control Ontario's greenhouse gas emissions.

The specific goals of the Survey were threefold:

1. to assess the level of political and corporate support for policies and programmes to stabilize and eventually reduce Ontario's greenhouse gas emissions;
2. to assess the extent of existing government and corporate action plans to stabilize and reduce Ontario's greenhouse gas emissions; and
3. to assess the willingness of governments and corporations to participate in a multi-stakeholder collaborative to develop carbon dioxide stabilization and reduction strategies for Ontario.

The Climate Change Survey was sent to:

1. The Prime Minister of Canada and the leaders of the federal opposition parties;
2. The Premier of Ontario and the leaders of Ontario's opposition parties;
3. The Mayors of Ontario's 40 largest cities;
4. The Chairs of Ontario Hydro and Ontario's 40 largest municipal electric utilities;
5. The Presidents of Centra Gas, Consumers' Gas and Union Gas; and
6. The Presidents and/or Chief Executive Officers of 131 Ontario corporations.

Respondents

The following persons did and did not respond to the survey:

**Prime Minister Jean Chrétien, Kim Campbell, Audrey McLaughlin and Chris Lea** (Leader of the Green Party) responded to the survey. **Lucien Bouchard, Mel Hurtig and Preston Manning** did not.

**Premier Rae** responded to the survey. **Lyn McLeod and Mike Harris** did not.

**Maurice Strong**, the Chair of Ontario Hydro, responded to the survey.

The Presidents of **Centra Gas, Consumers' Gas and Union Gas** did not.

For a complete listing of respondents see Table 1.

Table 1:

<i>Did Respond</i>		<i>Did Not Respond</i>		
<b>Federal Leaders:</b> Prime Minister Jean Chrétien Kim Campbell Audrey McLaughlin Chris Lea		Lucien Bouchard Mel Hurtig Preston Manning		
<b>Provincial Leaders:</b> Premier Bob Rae		Mike Harris Lyn McLeod		
<b>Provincial Energy Utilities:</b> Maurice Strong (Ontario Hydro)		Richard Walker (Centra Gas) Charles Safrance (Consumers' Gas) John Bergsma (Union Gas)		
<b>Municipal Electric Utilities:</b> Cambridge/ North Dumfries Etobicoke Gloucester Markham Niagara Falls		North Bay North York Ottawa Pickering Sarnia-Clearwater	Barrie Belleville Brampton Brantford Burlington Chatham East York Guelph Hamilton Kingston Kitchener	London Milton Mississauga Nepean Oakville Oshawa Peterborough Pickering Richmond Hill Scarborough St. Catherines
<b>Corporations:</b> Bell Brascan Cara Operations Devtek Domtar Dow Du Pont Falconbridge Goodyear Great Lakes Power Honda Hudson's Bay IBM ICI Canada		Inco Kmart Lennox Industries McDonald's Molson North American Life Northern Telecom Proctor & Gamble Rheem Canada Southam Sterling Pulp Chem. T-D Bank Unilever	See Appendix B for a listing of all corporations who did not respond.	
<b>Mayors:</b> Ajax Burlington Cambridge Etobicoke Hamilton Nepean Niagara Falls North York Oakville		Richmond Hill Sault Ste. Marie Scarborough Thunder Bay Toronto Waterloo Whitby York	Barrie Brampton East York Gloucester Guelph Kingston Kitchener London	Markham Mississauga Newcastle Oshawa Ottawa Peterborough Pickering Sarnia
			St. Catherines Stoney Creek Sudbury Windsor	

While the Climate Change Survey was sent to political leaders, chairs, chief executive officers and presidents of corporations, a number of survey responses were signed, on their behalf, by their subordinates. Appendix A lists the names and affiliations of all the Survey respondents.

Appendix B lists the mayors, municipal electric utilities and corporations that did not answer the survey.

Key Findings

a) Political Leaders, Maurice Strong and Ontario's Gas Utilities

Some of the key findings of the Survey are as follows.

1. Prime Minister Jean Chrétien, Audrey McLaughlin, Chris Lea (Leader of the Green Party) are in favour of reducing Canada's carbon dioxide emissions by 20%, relative to the 1988 level, by 2005.

2. Ontario Hydro is not committed to reducing its carbon dioxide emissions by 20%, relative to its 1988 level, by 2005.

3. Prime Minister Jean Chrétien, Kim Campbell, Audrey McLaughlin, Chris Lea and Premier Rae are in favour of stabilizing greenhouse gas emissions, at the 1990 level, by 2000.

4. Ontario Hydro is not committed to stabilizing its greenhouse gas emissions, at its 1990 level, by 2000.

5. Ontario Hydro supports the establishment of a system of tradeable carbon quotas to control the carbon dioxide emissions of Ontario Hydro and Ontario's large industrial energy users.

b) Corporations and Cities with Exemplary CO<sub>2</sub> Reduction Strategies

Domtar, Honda, Inco, Molson and North American Life Assurance have strategies to reduce their carbon dioxide emissions by 20%, relative to their 1988 levels, by 2005.

The cities of Hamilton, Toronto and Waterloo are committed to developing strategies to reduce the carbon dioxide emissions associated with activities in their cities by 20%, relative to their 1988 levels, by 2005.

c) Ontario Corporations, Municipal Electric Utilities and Mayors

The responses of corporations, municipal electric utilities and mayors to 11 of the survey questions are summarized below.

Question 1

According to the United Nations Framework Convention On Climate Change, Canada should adopt policies and measures to stabilize its greenhouse gas emissions at the 1990 level by the year 2000. Furthermore, according to the Ontario Round Table on Environment and Economy, "Greenhouse gas emissions must be stabilized, then reduced, below the 1990 level by the year 2000." **Do you support the establishment by the Government of Ontario of a greenhouse gas emissions control strategy (programmes, policies, regulations and/or taxes) to stabilize Ontario's greenhouse gas emissions at the 1990 level by the year 2000?**

Figure 1 : Yes Response to Question 1

Question 2

According to the Ontario Round Table on Environment and Economy, "Carbon dioxide emissions must be reduced by 20 per cent by 2005". **Do you support the establishment by the Government of Ontario of a carbon dioxide emissions reduction strategy (programmes, policies, regulations and/or taxes) to reduce Ontario's carbon dioxide emissions by 20%, relative to the 1988 level, by the year 2005?**

Figure 2 : Yes Response to Question 2

Question 3a

According to the Ontario Fair Tax Commission's Working Group on Environment and Taxation, the Government of Ontario should explore the use of economic instruments (e.g., carbon or energy taxes, the extension of the retail sales tax to energy) to achieve its carbon dioxide reduction goals. Moreover a carbon or energy tax will be revenue-neutral if 100% of the incremental tax revenues are used to reduce other taxes (e.g., reduce the rate of the retail sales tax from 8% to 7%, reduce personal and corporate income tax rates). **Do you support the extension of the retail sales tax to energy if 100% of the incremental tax revenues are used to reduce other provincial taxes?**

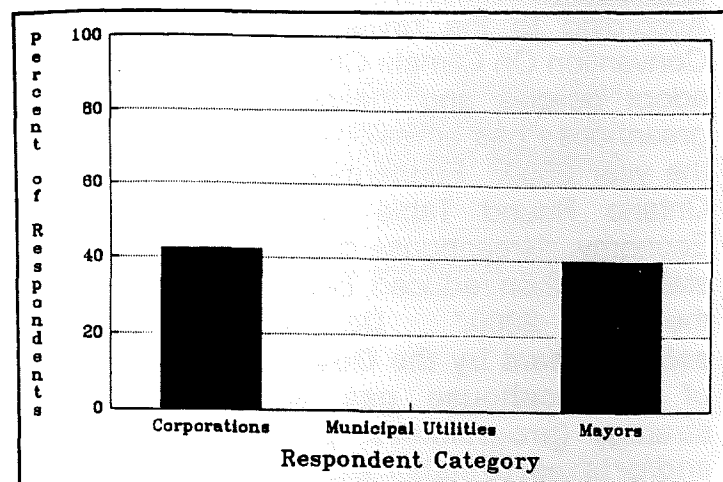

Figure 3 : Yes Response to Question 3a

**Question 3b**

**Do you support the extension of the provincial corporate income tax to Ontario Hydro if 100% of the incremental tax revenues are used to reduce other provincial taxes?**

**Figure 4 : Yes Response to Question 3b**

**Question 4a**

**Ontario Hydro and Ontario's large industrial energy users are responsible for approximately 35% of Ontario's carbon dioxide emissions.**

**Do you support the establishment of a system of non-tradeable carbon quotas to control the carbon dioxide emissions of Ontario Hydro and Ontario's large industrial energy users?**

**Figure 5 : Yes Response to Question 4a**

**Question 4b**

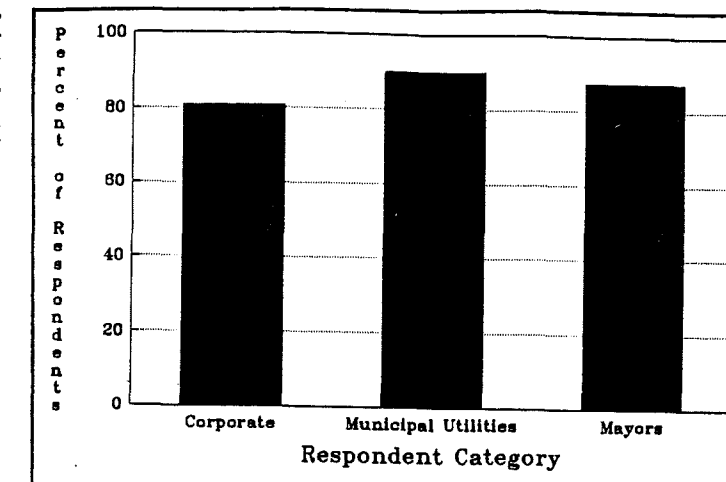

**Do you support the establishment of a system of tradeable carbon quotas to control the carbon dioxide emissions of Ontario Hydro and Ontario's large industrial energy users?**

**Figure 6 : Yes Response to Question 4b**

**Question 5**

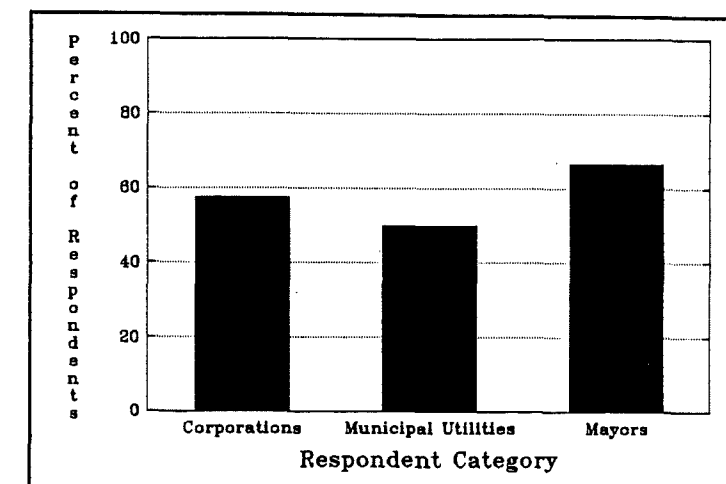

**Do you support using the Energy Efficiency Act and the Ontario Building Code to raise the minimum energy efficiency standards for energy consuming appliances and equipment and buildings?**

**Figure 7 : Yes Response to Question 5**

**Question 8**

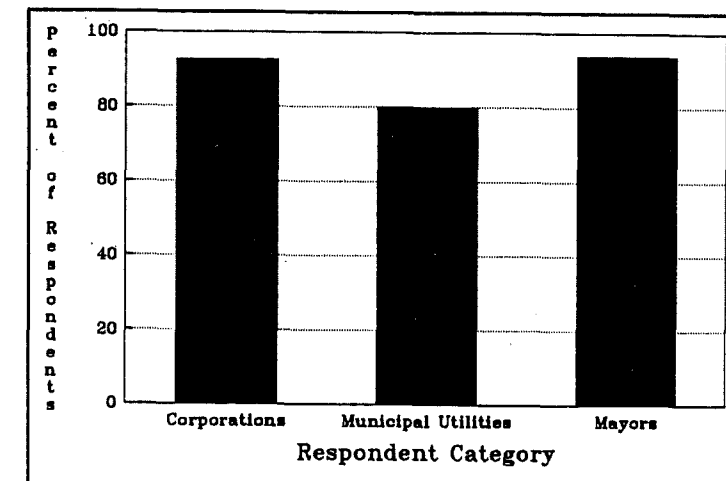

**Do you support the establishment of a mandatory minimum fleet average fuel efficiency standard for cars sold in Ontario?**

**Figure 8 : Yes Response to Question 8**

**Question 10**

**Do you support the aggressive promotion of energy efficiency by Ontario Hydro, Ontario's municipal electric utilities, Centra Gas, Consumers' Gas and Union Gas?**

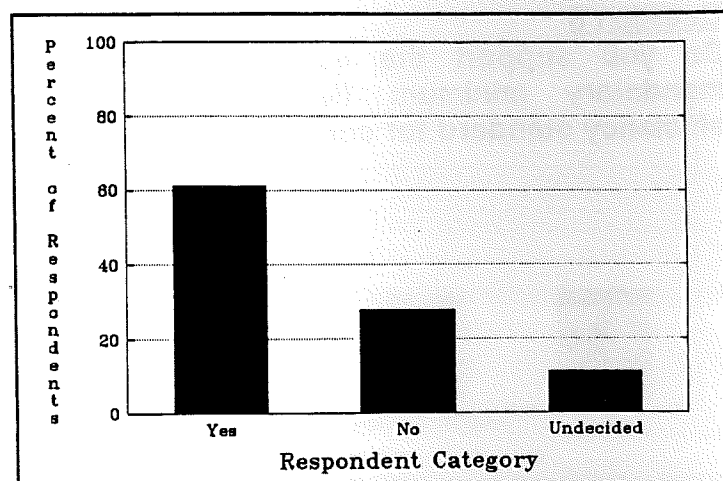

**Figure 9 : Yes Response to Question 10**

**Question 13 (Survey of Mayors only)**  
**Does your City have bicycle lanes?**

**Figure 10 :** Response to Question 13

**Question 14 (Survey of Mayors only)**  
**Is your City planning to create bicycle lanes or expand its existing network of bicycle lanes?**

**Figure 11 :** Response to Question 14

## Responses of Federal Political Leaders

1.	<p>According to the United Nations Framework Convention On Climate Change, Canada should adopt policies and measures to stabilize its greenhouse gas emissions at the 1990 level by the year 2000. <b>Do you support stabilizing Canada's greenhouse gas emissions at the 1990 level by the year 2000?</b></p> <p><b>Yes</b> Prime Minister Jean Chrétien, Kim Campbell, Audrey McLaughlin, Chris Lea</p> <p><b>No</b></p> <p><b>Undecided</b></p>
2.	<p>According to the Toronto Conference On The Changing Atmosphere, global carbon dioxide emissions should be reduced by 20%, relative to the 1988 level, by 2005. <b>Do you support reducing Canada's carbon dioxide emissions by 20%, relative to the 1988 level, by the year 2005?</b></p> <p><b>Yes</b> Prime Minister Jean Chrétien, Audrey McLaughlin, Chris Lea</p> <p><b>No</b></p> <p><b>Undecided</b> Kim Campbell</p>
3.	<p>A carbon or an energy tax would lead to a reduction in Canada's carbon dioxide emissions by giving consumers and corporations an increased financial incentive to use energy efficiently. A carbon or energy tax would be revenue-neutral if 100% of the incremental tax revenues are used to reduce other taxes (e.g., the GST, personal and corporate income tax rates). <b>Do you support the establishment of a revenue-neutral carbon or energy tax?</b></p> <p><b>Yes</b> Chris Lea</p> <p><b>No</b></p> <p><b>Undecided</b> Prime Minister Jean Chrétien, Kim Campbell, Audrey McLaughlin</p>
4a.	<p>Electric utilities and large industrial energy users are responsible for over 40% of Canada's carbon dioxide emissions.</p> <p><b>Do you support the establishment of a system of non-tradeable carbon quotas to control the carbon dioxide emissions of Canada's electric utilities and large industrial energy users?</b></p> <p><b>Yes</b> Chris Lea</p> <p><b>No</b></p> <p><b>Undecided</b> Prime Minister Jean Chrétien, Kim Campbell, Audrey McLaughlin</p>

4b.	<b>Do you support the establishment of a system of tradeable carbon quotas to control the carbon dioxide emissions of Canada's electric utilities and large industrial energy users?</b>
<b>Yes</b>	Chris Lea
<b>No</b>	
<b>Undecided</b>	Prime Minister Jean Chrétien, Kim Campbell, Audrey McLaughlin
5.	Canada's current automobile fuel efficiency programme requires car manufacturers to maintain a fleet average fuel efficiency standard for the vehicles they sell. <b>Do you support raising the minimum fleet average fuel efficiency standard for vehicles sold in Canada?</b>
<b>Yes</b>	Prime Minister Jean Chrétien*, Kim Campbell, Audrey McLaughlin, Chris Lea
<b>No</b>	
<b>Undecided</b>	
6.	<b>Do you support federal government participation in a multi-stakeholder collaborative to develop carbon dioxide stabilization and reduction strategies for Ontario?</b>
<b>Yes</b>	Prime Minister Jean Chrétien*, Kim Campbell*, Audrey McLaughlin, Chris Lea
<b>No</b>	
<b>Undecided</b>	

\* Responses subject to caveat(s)

## Responses of Premier Rae

1.	According to the United Nations Framework Convention On Climate Change, Canada should adopt policies and measures to stabilize its greenhouse gas emissions at the 1990 level by the year 2000. Furthermore, according to the Ontario Round Table on Environment and Economy, "Greenhouse gas emissions must be stabilized, then reduced, below the 1990 level by the year 2000." <b>Is the Government of Ontario committed to stabilizing Ontario's greenhouse gas emissions at the 1990 level by the year 2000?</b>
<b>Yes</b>	
2.	<b>Does the Government of Ontario have a strategy to stabilize Ontario's greenhouse gas emissions at the 1990 level by the year 2000?</b>
<b>No*</b>	
3.	According to the Ontario Round Table on Environment and Economy, "Carbon dioxide emissions must be reduced by 20 per cent by 2005". <b>Is the Government of Ontario committed to reducing Ontario's carbon dioxide emissions by 20%, relative to the 1988 level, by the year 2005?</b>
<b>Undecided*</b>	
4.	Does the Government of Ontario have a strategy to reduce Ontario's carbon dioxide emissions by 20%, relative to the 1988 level, by the year 2005?
<b>No*</b>	
5a.	According to the Ontario Fair Tax Commission's Working Group on Environment and Taxation, the Government of Ontario should explore the use of economic instruments (e.g., carbon or energy taxes, the extension of the retail sales tax to energy) to achieve its carbon dioxide reduction goals. Moreover a carbon or energy tax will be revenue-neutral if 100% of the incremental tax revenues are used to reduce other taxes (e.g., reduce the rate of the retail sales tax from 8% to 7%, reduce personal and corporate income tax rates).  <b>Do you support the extension of the retail sales tax to energy if 100% of the incremental tax revenues are used to reduce other provincial taxes?</b>
<b>Undecided*</b>	
5b.	<b>Do you support the extension of the provincial corporate income tax to Ontario Hydro if 100% of the incremental tax revenues are used to reduce other provincial taxes?</b>
<b>Undecided*</b>	

5c.	Do you support requiring Ontario Hydro to earn a fair market rate of return on its assets and pay a dividend to the Ontario Ministry of Finance if 100% of the Hydro dividend is used to reduce existing Ontario taxes?  Undecided*
5d.	Do you support the establishment of a revenue-neutral carbon or energy tax?  Undecided*
6a.	Ontario Hydro and Ontario's large industrial energy users are responsible for approximately 35% of Ontario's carbon dioxide emissions.  Do you support the establishment of a system of non-tradeable carbon quotas to control the carbon dioxide emissions of Ontario Hydro and Ontario's large industrial energy users?  Undecided*
6b.	Do you support the establishment of a system of tradeable carbon quotas to control carbon dioxide emissions of Ontario Hydro and Ontario's large industrial energy users?  Undecided*
7.	Do you support using the <u>Energy Efficiency Act</u> and the Ontario Building Code to raise the minimum energy efficiency standards for energy consuming appliances and equipment and buildings?  Yes
8.	Do you support raising Ontario's gas guzzler tax to encourage Ontarians to purchase more fuel efficient vehicles?  Undecided*
9.	Do you support raising the energy sipper rebate to encourage Ontarians to purchase super energy efficient cars (e.g., the Honda Civic, the Geo Metro and the Suzuki Swift all of which are manufactured in Ontario)?  Undecided*
10.	Do you support the establishment of a mandatory minimum fleet average fuel efficiency standard for cars sold in Ontario?  Yes
11.	Do you support increased funding for public transit?  Yes

12.	Do you support the aggressive promotion of energy efficiency by Ontario Hydro, Ontario's municipal electric utilities, Centra Gas, Consumers' Gas and Union Gas?  Yes
13.	Do you support provincial government participation in a multi-stakeholder collaborative to develop carbon dioxide stabilization and reduction strategies for Ontario?  Yes

\* Responses subject to caveat(s).

## Responses of Lyn McLeod and Mike Harris

1.	<p>According to the United Nations Framework Convention On Climate Change, Canada should adopt policies and measures to stabilize its greenhouse gas emissions at the 1990 level by the year 2000. Furthermore, according to the Ontario Round Table on Environment and Economy, "Greenhouse gas emissions must be stabilized, then reduced, below the 1990 level by the year 2000." <b>Do you support the establishment by the Government of Ontario of a greenhouse gas emissions control strategy (programmes, policies, regulations and/or taxes) to stabilize Ontario's greenhouse gas emissions at the 1990 level by the year 2000?</b></p> <p>Yes</p> <p>No No Response</p> <p>Undecided</p>
2.	<p>According to the Ontario Round Table on Environment and Economy, "Carbon dioxide emissions must be reduced by 20 per cent by 2005". <b>Do you support the establishment by the Government of Ontario of a carbon dioxide emissions reduction strategy (programmes, policies, regulations, and/or taxes) to reduce Ontario's carbon dioxide emissions by 20%, relative to the 1988 level, by the year 2005?</b></p> <p>Yes</p> <p>No No Response</p> <p>Undecided</p>
3a.	<p>According to the Ontario Fair Tax Commission's Working Group on Environment and Taxation, the Government of Ontario should explore the use of economic instruments (e.g., carbon or energy taxes, the extension of the retail sales tax to energy) to achieve its carbon dioxide reduction goals. Moreover a carbon or energy tax will be revenue-neutral if 100% of the incremental tax revenues are used to reduce other taxes (e.g., reduce the rate of the retail sales tax from 8% to 7%, reduce personal and corporate income tax rates). <b>Do you support the extension of the retail sales tax to energy if 100% of the incremental tax revenues are used to reduce other provincial taxes?</b></p> <p>Yes</p> <p>No No Response</p> <p>Undecided</p>

3b.	<p><b>Do you support the extension of the provincial corporate income tax to Ontario Hydro if 100% of the incremental tax revenues are used to reduce other provincial taxes?</b></p> <p>Yes</p> <p>No No Response</p> <p>Undecided</p>
3c.	<p><b>Do you support requiring Ontario Hydro to earn a fair market rate of return on its assets and pay a dividend to the Ontario Ministry of Finance if 100% of the Hydro dividend is used to reduce existing Ontario taxes?</b></p> <p>Yes</p> <p>No No Response</p> <p>Undecided</p> <p><b>Do you support the establishment of a revenue-neutral carbon or energy tax?</b></p> <p>Yes</p> <p>No No Response</p> <p>Undecided</p>
4.	<p>Ontario Hydro and Ontario's large industrial energy users are responsible for approximately 35% of Ontario's carbon dioxide emissions.</p> <p><b>a) Do you support the establishment of a system of non-tradeable carbon quotas to control the carbon dioxide emissions of Ontario Hydro and Ontario's large industrial energy users?</b></p> <p>Yes</p> <p>No No Response</p> <p>Undecided</p> <p><b>b) Do you support the establishment of a system of tradeable carbon quotas to control the carbon dioxide emissions of Ontario Hydro and Ontario's large industrial energy users?</b></p> <p>Yes</p> <p>No No Response</p> <p>Undecided</p>

10.	Do you support the aggressive promotion of energy efficiency by Ontario Hydro, Ontario's municipal electric utilities, Centra Gas, Consumers' Gas and Union Gas?
	Yes
	No No Response
	Undecided
11.	Does your Company have a strategy to stabilize the carbon dioxide emissions of its existing customers, for existing gas end-uses, relative to the 1990 level, by the year 2000?
	Yes
	No No Response
	Undecided
12.	Does your Company have a strategy to reduce the carbon dioxide emissions of its existing customers by 20%, for existing gas end-uses, relative to the 1988 level, by the year 2005?
	Yes
	No No Response
	Undecided
13.	Could government policies to reduce carbon dioxide emissions create market opportunities for your company?
	Yes
	No No Response
	Undecided
14.	Would your Company be willing to participate in a multi-stakeholder collaborative to develop a carbon dioxide stabilization and reduction strategy for Ontario?
	Yes
	No No Response
	Undecided

## Responses of Ontario Municipal Electric Utilities

1.	According to the United Nations Framework Convention On Climate Change, Canada should adopt policies and measures to stabilize its greenhouse gas emissions at the 1990 level by the year 2000. Furthermore, according to the Ontario Round Table on Environment and Economy, "Greenhouse gas emissions must be stabilized, then reduced, below the 1990 level by the year 2000." Do you support the establishment by the Government of Ontario of a greenhouse gas emissions control strategy (programmes, policies, regulations and/or taxes) to stabilize Ontario's greenhouse gas emissions at the 1990 level by the year 2000?
	Yes 80% Cambridge N. Dumfries, Gloucester, Markham, North Bay, North York*, Ottawa, Pickering, Sarnia-Clearwater
	No 10% Etobicoke, Niagara Falls
	Undecided 0%
2.	According to the Ontario Round Table on Environment and Economy, "Carbon dioxide emissions must be reduced by 20 per cent by 2005". Do you support the establishment by the Government of Ontario of a carbon dioxide emissions reduction strategy (programmes, policies, regulations and/or taxes) to reduce Ontario's carbon dioxide emissions by 20%, relative to the 1988 level, by the year 2005?
	Yes 60% Cambridge N. Dumfries, Gloucester, Markham, North Bay, North York*, Ottawa
	No 20% Etobicoke, Niagara Falls
	Undecided 20% Pickering, Sarnia-Clearwater
3a.	According to the Ontario Fair Tax Commission's Working Group on Environment and Taxation, the Government of Ontario should explore the use of economic instruments (e.g., carbon or energy taxes, the extension of the retail sales tax to energy) to achieve its carbon dioxide reduction goals. Moreover a carbon or energy tax will be revenue-neutral if 100% of the incremental tax revenues are used to reduce other taxes (e.g., reduce the rate of the retail sales tax from 8% to 7%, reduce personal and corporate income tax rates).  Do you support the extension of the retail sales tax to energy if 100% of the incremental tax revenues are used to reduce other provincial taxes?
	Yes 0%
	No 90% Cambridge N. Dumfries, Etobicoke, Gloucester, Markham, Niagara Falls, North Bay, North York*, Ottawa, Pickering
	Undecided 10% Sarnia-Clearwater
