OK Mark that would be great. What we can do is that I can give the warp speed overview and then you can outline significant components of these particular new developments. Can you give highlights of Oak Ridges Moraine and Niagara Escarpment legislation as well? That way we can give them the overview of the various regimes and processes in my presentation which will outline concepts like deadlines for appeals - not in detail but to make sure they realize there are such deadlines etc. and will also explain how things fit together, your presentation can then be helping them zero in on some of the particulars in particular planning regimes in the province. Theresa McClenaghan, Counsel,
Canadian Environmental Law Association
301-130 Spadina Ave., Toronto, ON M5V 2L4
