Mr. Dennis Y. Perlin, C.A.O.
Regional Municipality of Halton,
1151 Bronte Road,
Oakville, Ontario
L6J 6E1

Dear Mr. Perlin:

Subject: Drilling at Bayview Landfill Site - Burlington
- Dr. Cherry's Invoice

I acknowledge receipt of your letter dated October 27th, with attachments, in connection with Dr. Cherry's Invoice of September 10, 1982.

If you will refer to our Council Motion of August 9th, one of the conditions of the City's contribution of one third of Dr. Cherry's drilling work was "that the Ministry of the Environment laboratories perform the chemical analysis at no charge."

To date we have received no written confirmation of this condition of our agreement and I would therefore appreciate a copy of the Ministry's written confirmation that the chemical analysis will be performed at no charge. When I receive this statement I will approve payment of the City's portion of this invoice.

Yours truly,

Michael H. Boggs
CHIEF ADMINISTRATIVE OFFICER

OCT 25 1982

**CHIEF ADMINISTRATOR
REGIONAL MUNICIPALITY
OF HALTON**

Dear Mr. Perlin:

Please find enclosed invoices for drilling that was conducted for me as part of the University of Waterloo research effort at the Bayview Park landfill. The invoices are a fair charge for the drilling that was done. The charge rates were agreed to by me prior to the beginning of the drilling program. It is my understanding that the Region will make arrangements for payment directly to All Terrain Drilling Limited.

In my letter to you in September, I indicated that we were proceeding with the drilling of all of the holes that are planned in our use of the drilling funds that have been committed to us by the Region in cooperation with the City of Burlington and National Sewer Pipe Limited. However, we have recently decided to delay the drilling of the last two holes until April, 1983. We have decided that we have installed a sufficient number of monitoring devices to fully occupy our capabilities for monitoring and sampling this fall. We want to obtain some detailed data sets in order to provide a better basis for the choice of the remaining two sites.

Yours sincerely,

John Cherry

Regional Solicitor

DATE DATE: 1982 11 05

RE: ENVIRONMENTAL ASSESSMENT HEARING - FILE: 1982-37

The appeal process under the Environmental Assessment Act relates to various scenarios as follows:

1. The proponent of an undertaking does not proceed with the undertaking until the Environmental Assessment has been accepted by the Minister and the Minister has given his approval to proceed with the undertaking. Similarly no licenses and other permission are to be given until the Minister has given approval. When the Minister received the Assessment given by the proponent the Minister is required to undertake a number of actions and there is specific directions given as to what matters must be considered by the Minister prior to giving approval.

If the Minister then considers the assessment and decides that no hearing is required and that the assessment should be approved, it could still be open to apply to Divisional Court on a question of whether the Minister has done all of the procedural aspects required in Sections 7, 8 and 9 of the Act. This is not a usual course of action but could be construed as an "appeal" in the layman's sense of objections.

2. If a Hearing is required before the Environmental Assessment Board and that Board renders the decision then any of the decisions, orders, directions, resolutions, or rulings of the Board cannot be questioned or reviewed in any Court and no proceedings shall be taken in any Court by way of Injunction, Declaratory Judgment, Certiorari, Mandamus, Prohibition, Application for Judicial Review, Quo Warranto or otherwise to question, review, prohibit or restrain the Board or any of its decisions, orders, directions, resolutions or rulings. However, within 28 days after receipt by the Minister of a decision of the Board, the Minister may, with the Approval of the Lieutenant Governor and Council (or such Ministers of the Crown as the Lieutenant Governor or Council may designate):

Item # 2

CITY OF BURLINGTON

C.A.O. 54/82

November 23, 1982

File: 75-1.3

The Chairman and Members of the
Solid Waste Management Committee

SUBJECT: Joint Task Force on Transfer Stations

RECOMMENDATIONS:

That the City of Burlington endorse the proposal by the C.A.O.'s of the Region of Halton and of the area municipalities, that a joint task force of staff prepare a position paper on the role, responsibility for, and financing and operation of transfer stations; and

That the C.A.O. be authorised to appoint staff representatives to this task force as appropriate.

REPORT:

Several years ago the Region's consultants proposed that transfer stations be included in the Region's solid waste management program. The Region has initiated several transfer station proposals and is now seeking approvals for a transfer station in the industrial area of Halton Hills which will be operated by Leferink Disposal Ltd.

At no time has the Region enunciated a comprehensive policy on transfer stations covering the following matters:

- criteria for establishing transfer stations (including siting, and probable landfill implications)
- responsibility for establishing and for operating transfer stations
- the financing of transfer station facilities and operations

Since the establishment and operation of a transfer station has the potential to benefit one municipality at the expense of another, and to prejudice future significant solid waste management decisions, the CAO of the City of Burlington proposed to the regional CAOs that a staff task force be established to formulate a comprehensive transfer station policy. This suggestion was approved by the regional CAO's at their meeting on November 19, 1982.

Respectfully submitted,

Michael H. Boggs
CHIEF ADMINISTRATIVE OFFICER
