Attention: Douglas Hodgson, Esq.

Re: Regional Municipality of Halton
- Consolidated Hearing

Dear Mr. Hodgson:

The purpose of this letter is to ensure that you have copies of materials which we believe we have distributed to you previously and to convey to you and ensure that you have certain corrections to our report concerning the topic of hydrogeology which we also believe we have previously conveyed to you.

Corrections to Reports and Witness Statements

Corrections to the Joint Witness Statement
of Drs. Charlesworth and Rowe:

- Page 5: ✓ The sixth line from the bottom should read
"One would not expect to find organics ..."
- Para 10: ✓ This is out of order as it applies to comments
to be made with regard to Site D.
- Tab 2
Page 62
Para 1 ✓ On the second line, the word "more" should be
substituted for the word "less".

Corrections to Geocon Report re Site D:

Page 5-8

Para 2: On the fifth line, the word "horizontal" should be deleted and replaced by the word "zero". ✓

Page 5-15:

At the bottom of the page, under the heading "Borehole", all of the number 5's should be replaced by the letter "S" (e.g. Borehole 1-845, should now read Borehole 1-84S). ✓

Page 5-18

Table 1: "Ca Cu₃" should be replaced by "Ca Co₃". ✓

Corrections to Geocon Report re Site F:

Page 4-6

Para 2: On the first line, the peizometer number is not 4 but 1. ✓

Page 4-7

Para 2: The second line should read, "i.e. north of the railroad tracks", not south. ✓

Other Documents Being Transmitted Herewith

- a) A paper entitled "Laboratory Determination of Chloride Diffusion Coefficient in Intact Shale" by Barone and R. Kerry Rowe. (This was distributed to counsel present at the hearing on January 21st and will not be enclosed with this letter except for those counsel who were absent.) This paper constitutes, in effect, an appendix to Dr. Rowe's Site F Report.
- b) "Calculation Showing That 100 Fold Change in Hydraulic Conductivity of Lower Fractured Unit does not Significantly Affect Discharge Flow Through that Unit". This is relevant to paragraphs 17(a) and 17(b) of the Joint Witness Statement.
- c) "Schematic of Scenario "B" & Results for Benzene".
- d) "Schematic of Scenario "B" & Results for Chloride".

Douglas Hodgson, Esq.

3.

The last two documents referred to are additional overheads to be used.

Yours sincerely,

DAVID ESTRIN
