Joint Review Panel;

Re – DGR Joint Review Panel Hearing Written-Only Submission

As a former employee of Ontario Hydro and later OPG (Ontario Power Generation) I was for 30 years immersed in the #1 Value of the Nuclear Division – Public and Employee Safety. This Value was not just a slogan, it permeated every element of work performed on site from waste handling and storage through mechanical, electrical, operating, engineering, and planning work. I believe this same high standard of safety consciousness has been applied to the development of this DGR (Deep Geological Repository) proposal. I believe this solution to long term storage of L&ILW is the best and safest option.

Respectfully submitted

David Bradley
