Written Submission from
Yvonne Keenan

In the Matter of

Ontario Power Generation Inc.

Proposed Environmental Impact Statement
for OPG's Deep Geological Repository
(DGR) Project for Low and Intermediate
Level Waste

Joint Review Panel

September 16 to October 12, 2013

Mémoire de
Yvonne Keenan

À l'égard de

Ontario Power Generation Inc.

Étude proposée pour l'énoncé des incidences
environnementales pour l'Installation de
stockage de déchets radioactifs à faible et
moyenne activité dans des couches géologiques
profondes

Commission d'examen conjoint

16 septembre au 12 octobre 2013

To Whom it may Concern:

As a 20 year Retiree and member of the Community – Port Elgin – I am in favour of the location of the DGR at the Bruce Nuclear Site.

My experience has been that every precaution is taken when handling the Waste on the Site. I as well as others were trained in every aspect of Safety when I worked in the Nuclear Power Site at the Bruce. It was always the primary subject taken when we were going to do any work. This was also the experience I had with every aspect of Ontario Hydro. Consequently, I believe, that the Site was chosen after every aspect of Safety was studied.

We are the people who have worked at the Bruce Nuclear Site and the people who continue to live in this area without fear and with confidence that the DGR Safety Programs are in place. We have been kept up to date by the members of the DGR for the last several years at our Retiree Meetings.

I and others I have spoken to are in approval of the Ontario Power Generation – Deep Geologic Repository Project.

Thank you.

Yvonne Keenan
