As a resident of Southeastern Michigan, I am alarmed that a nuclear waste dump on the shores of Lake Huron would even be a consideration. Lake Huron is the source of my drinking water and, should an accident occur, it could be fatal to me and my fellow neighbors downstream. It is very reckless of you to propose something that has never been done before, especially when nuclear waste dumps in other countries are leaking. Should there be a problem, the consequences could be horrific.

I urge you to reconsider this proposal for the sake of all life in this region.
